SKILLS

• Soft Skills / Leadership:

Team Management & Leadership,
Information Analysis,
High Adaptability

• **Programming:** C, C++, Python
(NumPy, Pandas, Scikit-learn),
SQL HTML, CSS

• **Networking:** HTTP, TCP/IP, DNS
(basic)

• **Operating Systems:** Linux
(Ubuntu/Debian), Bash Scripting

• **Tools:** Git/GitHub, Wireshark,
PyCharm, Visual Studio Code,
MySQL

LANGUAGES

- Hebrew - Mother Tongue
- English - fluent

PROFILE

President's Honor List B.Sc. Computer Science student (2nd year) with a **99.5 GPA, 8200 Unit alumnus** and former **Team Leader**.

Looking for a Software Engineer role (Student / Full-Time).
Bringing strong technical expertise in C, Python, algorithmic problem-solving, and automated data systems

EDUCATION

• B.Sc. in Computer Science - HIT – GPA: 99.5

Nov 2024 – Present

- President's Honor List
- **Member of the HIT Honors Program "MAGNET"**
 - Selected for **HIT's elite honors program**, participating in advanced AI workshops and collaborating directly with leading high-tech companies.
 - Completed a summer internship specializing in n8n automation, leading cross-border workflows and working in English with project partners in Brazil.

• Ort Holon High School

- **5 unit in:** English, Mathematics, Physics, Computer Science and System Programming
- Average - 116

WORK EXPERIENCE

• 8200 unit - Commander of intelligence analysis team

Oct 2023 - Oct 2024

- **Led a team of 25 analysts**, managing complex operations and prioritizing critical tasks under high-pressure conditions.
- Developed efficient work methods and a roadmap for successful completion of team projects.

• 8200 unit - Intelligence Information Analyst

Oct 2021 - Oct 2023

- Analysis of classified databases & cross-referencing data for the purpose of assembling an intelligence image.
- Management & leadership of intelligence projects.
- Collaborating with military and civilian partners

PROJECTS

• C Systems & Software Development (TAKI & Employee Management) -

Developed high-performance systems in C, implementing complex algorithms and advanced data structures like Linked Lists.

• **AI-Enhanced Machine Learning with OpenAI Codex** - Developed predictive models (KNN) using Python (Scikit-learn, NumPy, and Pandas), uniquely integrating OpenAI's Codex to automate code generation and optimize data preprocessing.
