## SKILLS

- Team management and leadership  
Teamwork
- Flexibility and Adaptability
- Information Analysis
- High work ethics
- Programming:** C, C++, Python  
(NumPy, Pandas, Scikit-learn),  
SQL HTML, CSS
- Networking:** HTTP, TCP/IP, DNS  
(basic)
- Operating Systems:** Linux  
(Ubuntu/Debian), Bash Scripting
- Tools:** Git/GitHub, Wireshark,  
PyCharm, Visual Studio Code, MySQL

## LANGUAGES

- Hebrew - Mother Tongue
- English - fluent

## PROFILE

High-achieving **Computer Science student** and **8200 Unit Alumnus**, maintaining a perfect **100 GPA** within the 'Magnet' **excellence program** while completing 550+ reserve days.  
A former Intelligence Analyst and Team Leader of 25 soldiers, specializing in systems programming and **data analysis** using **C and Python**.  
Expert in solving complex algorithmic problems and optimizing data systems, with a track record of driving significant operational impact.

## WORK EXPERIENCE

### Commander of intelligence analysis team at 8200 unit

Oct 2023 - Oct 2024

- Led a team of 25 analysts, managing complex operations and prioritizing critical tasks under high-pressure conditions.
- Executed a Data Recovery project that doubled team productivity by developing automated scripts and complex SQL queries to restore corrupted data.
- Expertise in big-data systems and advanced knowledge-management tools to generate actionable intelligence.

### Mandatory Service -Intelligence Information Analyst

Oct 2021 - Oct 2023

- Analysis of classified databases & cross-referencing data for the purpose of assembling an intelligence image.
- Management & leadership of intelligence projects.
- Working with role partners in & out IDF.

## PROJECTS

### C Systems & Software Development (TAKI & Employee Management) -

Developed high-performance systems in C, implementing complex algorithms and advanced data structures like Linked Lists. Managed manual dynamic memory and robust backend logic to ensure high system reliability and performance.

### AI-Enhanced Machine Learning with OpenAI Codex -

Developed predictive models (KNN) using Python, uniquely integrating OpenAI's Codex to automate code generation and optimize data preprocessing. This approach leveraged Scikit-learn, NumPy, and Pandas to accelerate development and transform raw data into high-performance insights.

## EDUCATION

### Holon Institute of Technology (HIT)

B.Sc. in Computer Science

Nov 2024 – Present

- Member of the HIT Honors Program "MANGET"**
- Achieved a GPA of 100**

### Ort Holon

- English, Mathematics, Physics, Computer Science and System Programming–  
5 units each.
- Obtained a final grade point average of 116
